

PPP Highland Schools

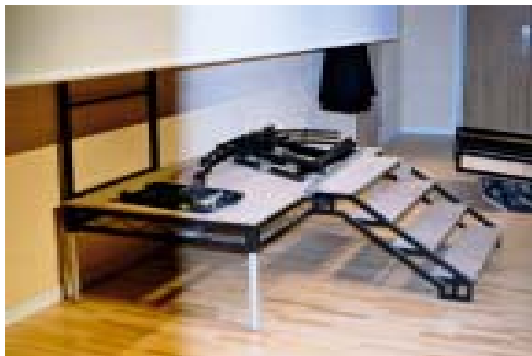

During the summer of 2002 the contractor MJ Gleeson approached SI Sound and Light to assist with two Flagship PPP Projects in Highland Council. Ardnamurchan and Glen Urquart Community Schools have resulted in the provision of tremendous facilities for both the school and the communities they serve.

GLEESON

MJ Gleeson and NJ Baileys the main contractors for the PPP Projects approached SI Sound and Light with a short lead time project in the Summer of 2002. Although the major specification for the assembly hall entertainment equipment had been completed the design of the detailed requirements and implementation had to be completed very quickly to ensure the completion of the project within the predetermined works timetable. The works consisted of a full theatrical setup including 48 Circuits of dimmable lighting, portable staging, fully operational front side and rear curtains and a production sound system for providing sound reinforcement for any presentations or shows. In addition a full surround sound commercial cinema system comprising of JBL audio components and Sanyo projection equipment allows full audio visual presentations and full feature presentations to take place in the assembly hall.

After handover of the project to the client SI Sound and Light completed comprehensive training on all installed equipment for members of staff and pupils of both the Srontian and Drumnadrochit schools.

The Highland Schools projects were developed as a result of Highland council's first education public private partnership. It recieved funding from the Highland Council, Community Schools Highland Ltd, sportscotland lottery fund, the European Union, Scottish Arts council Lottery fund and Lochaber Enterprise.

SI Sound and Light Ltd - Projects - Design and Build

From an initial design concept, through to a fully installed system, SI Sound and LightLtd can provide the complete solution for your project. We are a dynamic company with experts drawn from many backgrounds in the sound and lighting industry. Long established connections with a network of partners in other installation trades allow us to plan projects with realistic and achievable targets. An experienced project manager manages our technical experts for the duration of the project. This ensures that our work will run smoothly within your project plan and always be completed to the set timescale.

With a 30 year history and a prestigious reputation in the area ,SI Sound and Light (Previously known as Sweet Inspiration) is able to use its extensive portfolio of products to provide clients with the best choice of lighting and audio solutions. With equipment available from the worlds leading manufacturers combined with our in depth experience of working on projects in a wide diversity of environments, we can meet your every need.

Our in-house designer will work with you to design an exciting and functional system that meets your exact needs. Using advanced computer graphics programmes, we are able to create realistic visualisations of a proposed lighting system in action. In Addition we can produce computer aided sound design documentation for the project supporting designs and giving you a glimpse into the future. We can produce both rendered still shots and an animated ‘fly through’ so that you can fully appreciate the effectiveness of the scheme before installation begins.

Acting as designer, supplier and installer of your lighting and audio system, SI Sound and Light is able to provide highly competitive prices. This also means that due to our project management you only have one supplier to liase with. It also enables our fully qualified team of installation engineers to provide you with a world-class installed system, delivered on time and at a price that meets your budget requirements.

Once installed and operating, it is important that your system is kept running to the same quality as when it was first installed. SI Sound and Light offer full maintenance contracts, whereby we can provide professional lighting and audio technicians to periodically visit, and service your lighting and sound systems guaranteeing that it remains at peak performance.

“The works was completed to the satisfaction of the client and ourselves as main contractor in a most professional manner, and we would have no hesitation in using this company again to carry out any similar work on future contracts”

Managing Surveyor
MJ Gleeson

“The venue also has a large screen which folds down and we can watch presentations, DVDs, slide shows and lots of other things. So the venue can be used as a cinema which is really cool !”
